

THE JOURNAL - A TRAVEL TO ETERNITY

A. C. Bhide*

Let me tell you first,
I am seventy-five just,
Knowing this, for you is a "must",
Since I am doing my utmost best

"TQM is my base.
I am keeping with the world, pace,
Looking around at the quality mess,
Applying my mind case to case.

I am aware that TQM is an ocean,
I am sailing my ship with certain notion,
Although not having required motion,
Getting success or not, is never my question,

There is a definitely a bright future,
About which we all are quite sure,
When people have started looing what is pure,
Arriving to such situation is itself very rare.

Those who have a strong belief,
Quality knowledge will give thema relief,
Whenever they are at the helm of problem cliff,
They will never think of "But or if".

I Started with Engineering Education Journal,
The need of such work is eternal,
With your backing I have started my travel,
To a destination which is a "marvel".

The travel is eternal & ever,
There is no looking back now & never,
You only can give me strength to work forever,
Let us then go to that destination together.
