

Editorial

Dear Readers of JEET,

It is my pleasure to introduce the October 2016 issue of JEET. As many of you already know, our goal is to strengthen the culture of engineering education research in institutions all over India. Thank you for your support in this endeavor.

This issue contains several more of selected papers presented at ICTIEE 2016 (Third International Conference on Transformations in Engineering Education) in January.

The next issue in January will be a special one and feature the best papers submitted to the Fourth International Conference on Transformations in Engineering Education (ICTIEE 2107), co-organized by IUCEE. ICTIEE 2107 will be held at three locations: Jan 6-8, 2017 at Vardhaman College of Engineering, Hyderabad, Jan 9-10, 2017 at R.K. University, Rajkot and Jan 11-12, 2017 at Manipal University Jaipur. Please visit the website for information :<http://www.ictiee.org/>. Workshops will be conducted by international experts at all three locations on how to conduct research and publish papers in engineering education. Please plan to participate.

The 2016-17 International Engineering Educators Certification Program (IIEECP) was started with seven Phase I Pre-Certification Workshops all over India (Pune, Hyderabad, Chandigarh, Ghaziabad, Bangalore, Rajkot and Madurai). Phase II for these participants is being conducted during September to December 2016, with Phase III planned in January 2017. Several other Phase I workshops and Institutional Certifications are planned for the rest of the year. These will further enhance the culture of research in engineering education in India.

Three more IUCEE courses are also being offered this semester in a blended on-line mode on Outcomes Based Education, Engineering Education Research and Project Management in order to further facilitate engineering education research culture as well as the movement towards higher quality learner-centered engineering education.

We believe these efforts will lead to more quality papers for publication in JEET. Please spread the word and help increase the subscriptions for JEET.

Jai Ho !

Krishna Vedula
Chief Editor, JEET
